

DocKIT provides reliable document migration solution to Novadoc Technology

Background

Novadoc Technology specializes in enterprise content management, business process management and document automation solutions. Novadoc Technology provides Content Management and Document Automation solutions to professional organizations to save time and gain control of documents with a comprehensive range of document collaboration solutions. Novadoc selected DocKIT application to help them comprehensively migrate documents from IBM FileNet to Microsoft SharePoint 2010.

DocKIT solution advantage

Role of DocKIT

DocKIT played a major role to migrate 370,000 documents from an IBM FileNet P8 system to SharePoint for Novadoc Technology. Novadoc used DocKIT application to import the documents along with their related metadata to SharePoint, while the export from IBM FileNet P8 to file system was accomplished using a custom-built application.

DocKIT read the folder structures, found the relevant files, associated the corresponding metadata from the XLS file and imported the documents to SharePoint.

Solution Overview

Customer Profile

Novadoc Technology is a privately-held Dutch corporation founded in 1998. Novadoc Technology is a consulting and software development company specializing in providing quality Enterprise Content Management and Process Management solutions using advanced technology of leading software suppliers.

Business Situation

Novadoc Technology was searching for a reliable migration tool to help them move documents and their metadata from IBM FileNet to SharePoint 2010. Novadoc chose DocKIT for SharePoint 2010 as the best solution for their document migration needs.

Benefits

DocKIT is a key component that forms part of Novadoc Technology's delivery pipeline for swift and reliable migration of 370,000 documents from an IBM FileNet P8 system to SharePoint 2010.

- ✓ DockKIT enabled fast, smooth and accurate importing of documents and metadata to SharePoint 2010.

Benefits

DockKIT is a key component that forms part of Novadoc Technology's delivery pipeline for swift and reliable migration of documents from an IBM FileNet P8 system to SharePoint 2010. Useful features in DockKIT were:

- ✓ Option to remove the files from the folder structure that were imported previously.
- ✓ You could just restart a task quickly using the Re-import tool, when an import was stopped for some reason.
- ✓ Import documents and metadata to SharePoint without learning their APIs.
- ✓ Documents that had the same name within the same folder in IBM FileNet were renamed using DockKIT's renaming feature when moving to SharePoint.

Resources

Vyapin's DockKIT for SharePoint solution enables you to migrate data, documents and their associated metadata properties from network file shares, file servers and local hard drives to SharePoint 2010 and SharePoint 2007. DockKIT supports Microsoft SharePoint Server 2010 / Microsoft SharePoint Foundation 2010 and Microsoft Office SharePoint Server 2007 (MOSS 2007) / Microsoft Windows SharePoint Services v3.0 (WSS 3.0) environments.
