Overview

Dockit 365 Migrator is a high speed SharePoint bulk migration tool exclusively designed for Office 365. Dockit 365 Migrator helps you migrate content from on premise SharePoint servers, network file shares, file servers and local hard drives to Microsoft Office 365 - SharePoint Online and OneDrive for Business, while preserving file properties and associated metadata.

Vyapin's Dockit 365 Migrator tool uses the Office 365 Migration API that boosts the speed of file migration by leveraging Azure. The application has been built from ground-up to cater to the needs of businesses in all sizes, from small to large enterprise.

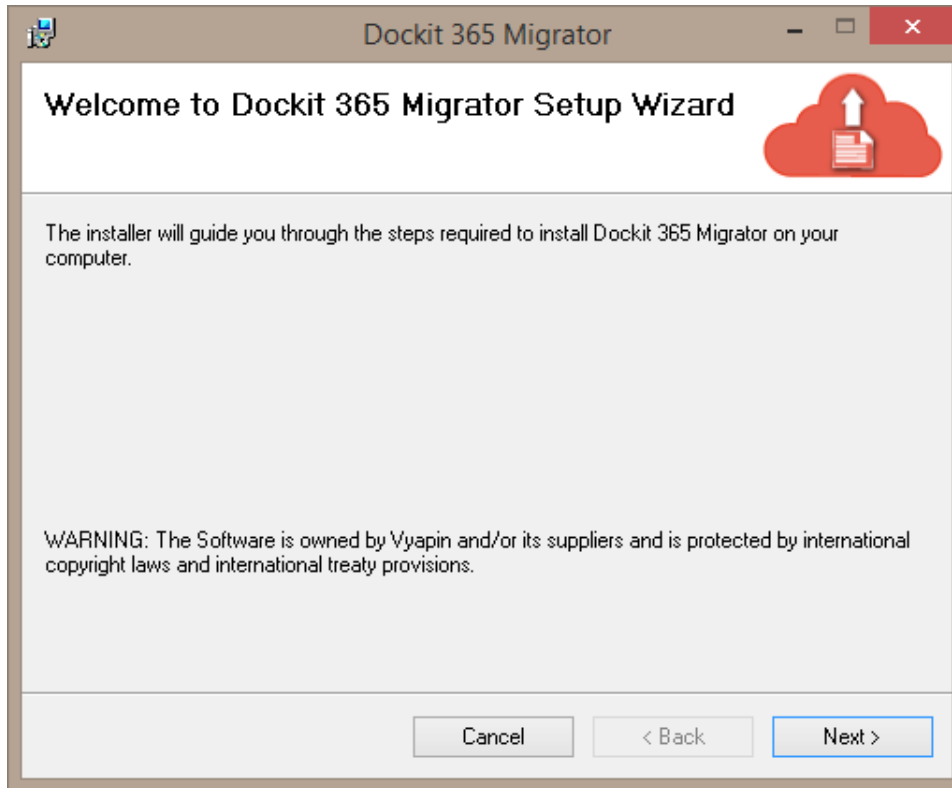

System Requirements

- Windows 10 / Windows 8 / Windows 7 (or) Windows Server 2012 / Windows Server 2008 with the latest service packs (32 or 64 bit platforms)
- .NET Framework 4.5 or higher

Installation Steps

The simple setup wizard will guide you through the installation process as shown below:

Step 1: Once you double-click the Docket365Migrator.msi, the setup wizard will appear as shown below:

Click **Next** to proceed.

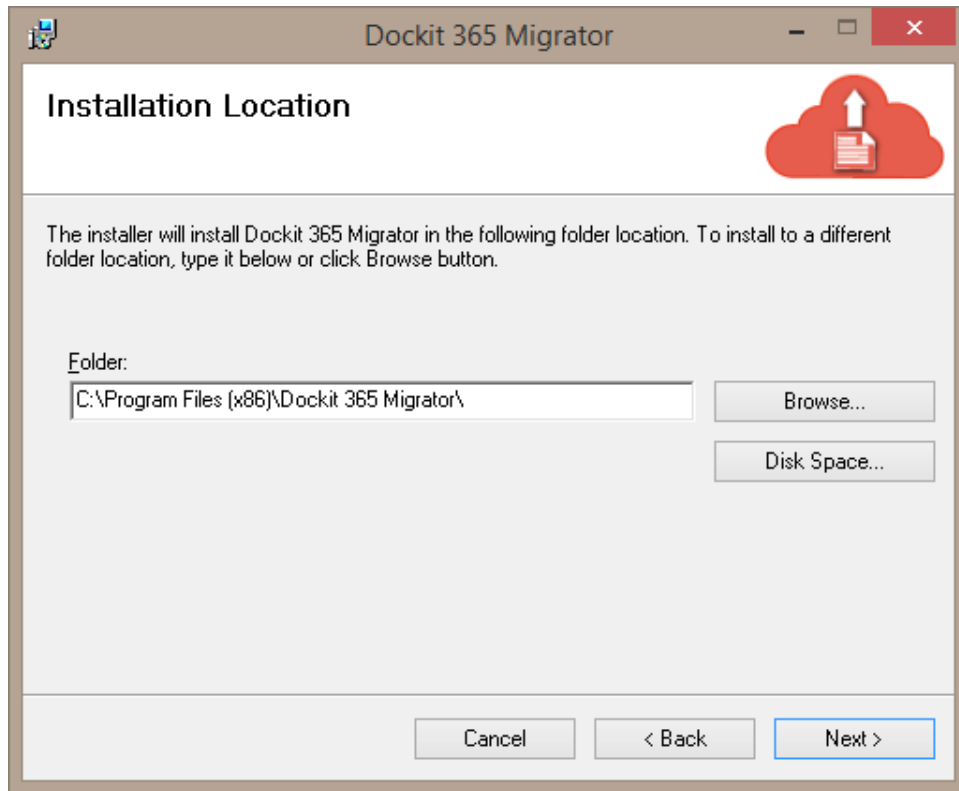

Step 2: License Agreement screen will be shown as below:

Please go through the License Agreement information to familiarize yourself with the contents. This will help you when purchasing the product license.

Click **I Agree** to accept the terms in the **License Agreement** screen and Click **Next** to proceed.

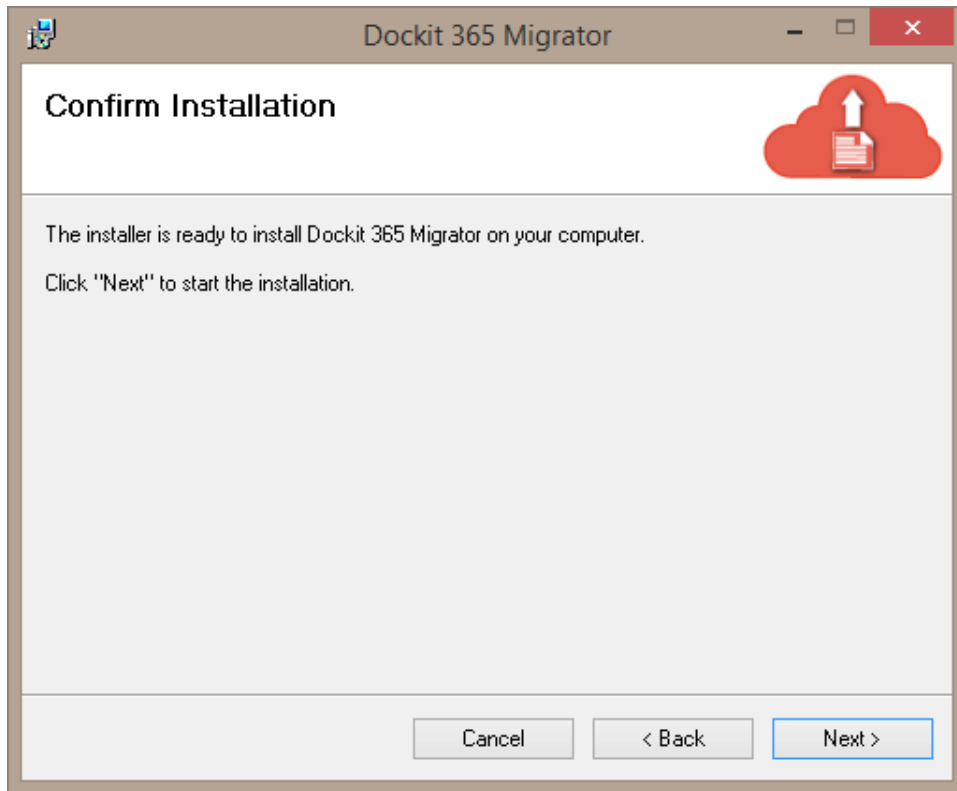

Step 3: Installation Location screen will be shown as below:

- You can select the default location displayed (or)
- You can specify your preferred location through the **Browse** button.

The **Disk Space** button is used to check for available free space in the partition you want to install the product. Click Next to proceed.

Step 4: Confirm Installation screen is displayed as below:

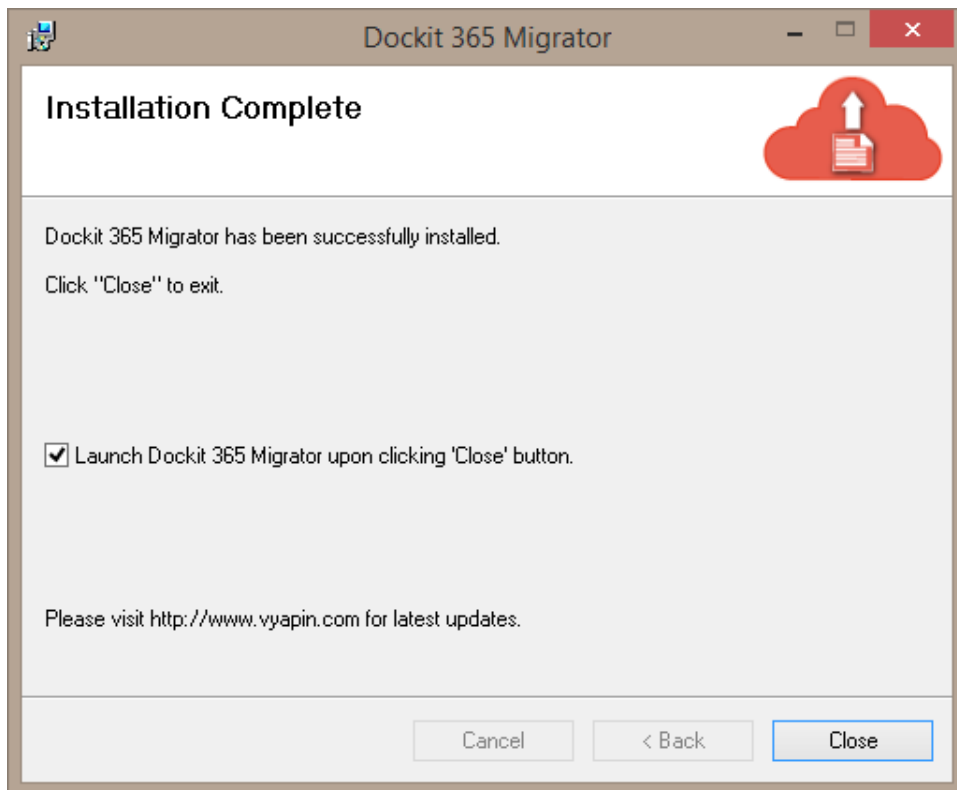

- **Back** – Click this if you want to retrace your steps and change the selected settings.
- **Next** – Click this if you want to proceed with installation.

The progress of the installation is displayed in the **Installing Docket 365 Migrator** screen as shown below.

Once the installation is complete, the **Installation Complete** window is displayed as below.

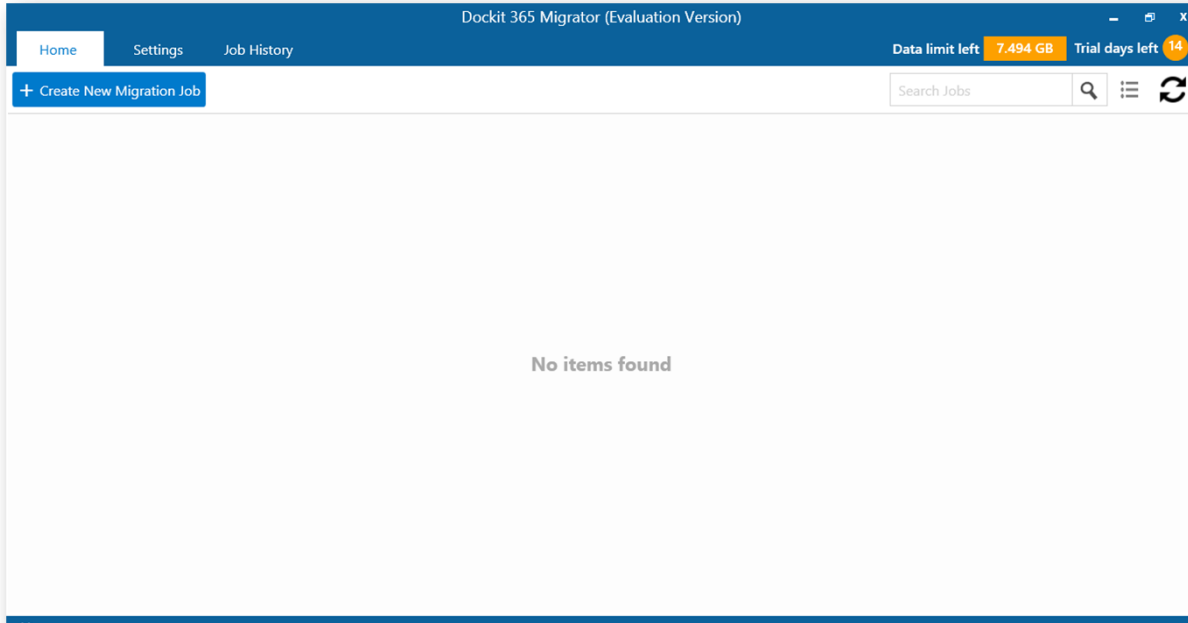

If the **Launch Docket 365 Migrator upon clicking 'Close' button** check-box is checked, then the application is launched immediately. If you do not want the application to start immediately, then uncheck this check-box.

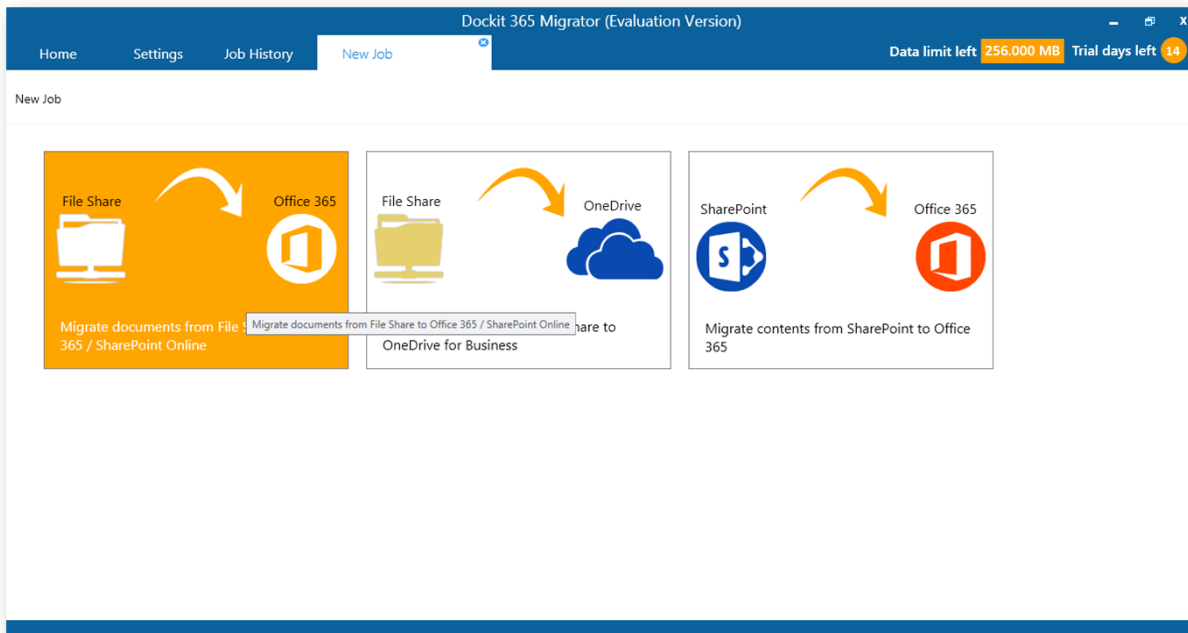

Click **Close** to close the installation wizard.

Create a new migration job in Docket 365 Migrator

1. Launch Docket 365 Migrator application, Home screen will be shown as below.

2. Clicking **Create New Migration** action will provide you the options as shown below.

3. You can select the migration type based on your requirements. For demo purpose, click **Migrate documents from File Share to Office 365 / SharePoint Online** option. It will bring you to a new Tab as shown below.

The screenshot displays the 'Docket 365 Migrator (Evaluation Version)' application window. The top navigation bar includes 'Home', 'Settings', 'Job History', and 'Content Migration'. On the right, it shows 'Data limit left 256.000 MB' and 'Trial days left 14'. The breadcrumb path is 'New Job > File share to Office 365 > Content Migration'. The main content area is split into two columns. The left column contains a text box with 'Content Migration' and a larger 'Job Description' text area. The right column is titled 'Office 365' and contains several input fields: 'Target URL' (a dropdown menu), 'Authentication' (a dropdown menu with 'Federated Identity' selected), 'User name' (a dropdown menu with 'User name' selected), and 'Password' (a masked text input). A blue 'Connect' button is located at the bottom right of the form.

4. You are now ready to setup your migration job.
