Migrate Content to OneDrive for Business

[Dokit Migrator for sharepoint](#) application helps you migrate contents from network file shares, file servers and local hard drives to microsoft SharePoint 2016 / 2013 / 2010 / 2007, SharePoint Online (Office 365) and OneDrive for Business, while preserving NTFS permissions, file properties and associated metadata.

Dokit 9.0 - Now With More Features

- ✓ Full support for SharePoint 2016 server
- ✓ Included a dedicated 'Migrate contents to OneDrive' for Business task option to migrate contents from user's personal drives to their respective OneDrive for Business locations.
- ✓ Perform incremental migration (delta migration) based on date filters.
- ✓ Overhauled main application window UI by introducing the new ribbon controls for easy navigation.

- ✓ Introduced 'Category Manager' to group migration tasks with color coding for easy identification of tasks.
- ✓ Improved task statistics with detailed information about the source contents as well as the migrated contents.
- ✓ 'Pre-migration Validation' tool has been greatly improved to show last run validation results and the test results are well classified in the 'Pre-migration Validation Results' screen.
